MEMORANDUM FOR: D/DCI/IC

SUBJECT: Requirements for Video Communications Among
Intelligence Agencies (INVIDEX Study)

1. Attached is a final report dated 2 December 1974 entitled Intelligence Video Exchange Study (INVIDEX) and cover memorandum from Director, NPIC to the Director of Central Intelligence through the Deputy Director for Science and Technology.

2. The purpose of this memorandum is to put this report in formal channels for D/DCI/IC action as appropriate prior to forwarding it to the DCI. The DDS&T front office has advised me that it is coordinating a joint statement with the DDI on this matter. Meanwhile DDS&T is forwarding the file to the IC Staff for its consideration.

3. It appears to me that the INVIDEX Study falls within the structure of the National Imaging Plan for Satellites (NIPS) which is now in final stages of drafting by [] Principal Deputy for Planning, DCI/IC. Under that draft plan I believe it is intended that I should have some responsibilities in connection with Imagery dissemination, and INVIDEX is a case in point. However, I am taking no action pending instructions from the IC Staff front office.
